

PSYCHIATRIC MENTAL HEALTH NURSE PRACTITIONER, DNP ADVANCED PRACTICE TRACK

This track prepares the student to diagnose and manage acute and chronic mental health problems across the lifespan (including pediatric through geriatric populations). The Johns Hopkins School of Nursing includes the use of the Perspectives of Psychiatry as an approach to the understanding and treatment of patients with psychiatric conditions. This inclusion offers systematic consideration of the patient's psychiatric condition from four perspectives: disease, dimensional, behavior, and life story.

Certification: Graduates will be eligible to apply for American Nurses Credentialing Center (ANCC) certification as a board certified psychiatric mental health nurse practitioner (PMHNP-BC).
